# ASSIGNMENT 1 – AVNI SHARMA (MODULE 6)

| No. | Problem (click to open) | Platform | Difficulty |
|---|---|---|---|
| 1 | Staircase | HackerRank | Easy |
| 2 | Printing Pattern Using Loops | HackerRank | Moderate |

1. **Staircase | HackerRank**

2. **Printing Pattern Using Loops | HackerRank**

```
    int size = 2 * n - 1;

    for (int i = 0; i < size; i++) {
        for (int j = 0; j < size; j++) {

            int top = i;
            int left = j;
            int bottom = size - 1 - i;
            int right = size - 1 - j;

            int min = top;

            if (left < min)
                min = left;

            if (bottom < min)
                min = bottom;

            if (right < min)
                min = right;

            printf("%d ", n - min);
        }
        printf("\n");
    }

    return 0;
}

    return 0;
}
```
